**Irrigation Management on Your SmartPhone**

## A New, Innovative, Feature Enhances the Way You Irrigate

Irrigators now have access to the latest technology for remote management of their pivots and linears.

Valley Tracker *Mobile* offers growers even more reasons to choose Valley Tracker:

- Use Smartphone technology to access and retrieve monitoring and control options from a Valley Tracker2 or TrackerSP positioned at the pivot point.
- View quick, easy-to-understand, color-coded graphics to check machine status for peace of mind.
- Save countless hours of drive time checking pivots and possible downtime at critical watering times.

With the high cost of running vehicles, it makes even more sense to integrate this technology into your operation – saving you hours of time and putting more profit to your bottom line.

## Monitor and Control Your Pivot\*

### Operate for as little as 50¢ a day\*

Cut late night pivot checks or driving through rough fields. Now you can remotely communicate with your pivots and linears, with significantly lower cost and less hassle, via Web, Smartphone or cell phone.

- ✓\* = yes if control panel has functional capabilities
- ✓\*\* = yes with pressure switch
- ✓\*\*\* = yes with transducer

\*Initial hardware and installation not included. Based on basic Tracker communication center plan rates (\$14.95/30 days).

A Smartphone with Windows® Mobile software version 5.0 or later is needed for Tracker Mobile to function properly.

## Valley Tracker2 (Digital)

With Tracker2, alarm messages are sent to your cell phone and/or to the Web, delivering important information to you wherever you are.

Tracker2 is compatible with all Valley control panels and most competitive panels. There is a low monthly service fee, plus you have the ability to change to an off-season rate.

## Valley TrackerSP (Digital)

This advanced version of the Tracker communication tool offers additional functionality and control. With TrackerSP, you can review field diagnostics, monitor and control application depth, turn equipment on and

off and change direction from your cell phone, Smartphone, or Internet connection.

TrackerSP can be used with the Select2 or Pro2 panels and mounts easily inside the panel.

## www.ValleyTracker.com

The new Tracker web site is a convenient and easy way to monitor the status of all the pivots in your farming operation. You can select a Map View or List View of your operation. Easy to understand aerial map views give you instant pivot information at a glance. Commonly used pivot control icons give you a quick, easy access to forward, reverse, stop and report commands. If you need more information, you are only a click away from the Device Details for each pivot including a graphic view of the pivot selected.
